PROFESSIONAL SUMMARY

Product Manager with hands-on experience owning AI and ML product delivery from discovery through launch, shaping roadmaps, defining product direction, and driving cross-functional alignment across engineering, design, and commercial teams. Shipped 4 AI-powered products to 10,000+ users at iQube and owned end-to-end SaaS implementation delivery for Fortune 500 clients at E2open. Comfortable in fast-paced, scaling environments with high ownership and ambiguity. MSc Computer Science — Intelligent Systems (Distinction), Trinity College Dublin. Dissertation in AI Ethics and Responsible AI Governance. **Dublin-based. Eligible to work without visa sponsorship. Available to start immediately.**

CORE SKILLS

Product Management:	Roadmap Ownership, Discovery to Launch, Backlog Prioritisation, User Stories, Acceptance Criteria
AI & Platform:	LLM Systems, Agentic AI, NLP, AI Ethics, Responsible AI, SaaS Platforms, API Integration
Delivery:	Agile, Scrum, Sprint Planning, Cross-functional Alignment, Stakeholder Management, Jira
Strategy:	Product Positioning, Go-to-Market, Customer Adoption, Feature Rollout, Data-informed Decisions
Technical:	Python, SQL, JavaScript, React.js, TensorFlow, PyTorch, AWS, Git, PostgreSQL, Power BI

WORK EXPERIENCE

Project Lead — *pS-Eau, DUCG x LEWAP (UNESCO-backed NGO)* Jan 2026 – Apr 2026 — Dublin, Ireland

- Owned end-to-end product and programme delivery in a high-ambiguity, greenfield environment; translated unclear organisational needs into structured roadmaps with measurable outcomes.
- Shaped strategy and delivery frameworks from scratch with full ownership; maintained cross-functional alignment across stakeholders and delivered against defined success criteria.

Associate Implementation Engineer — *E2open*

Sep 2024 – Jul 2025 — Bangalore, India

- Owned SaaS platform delivery for 3 Fortune 500 clients spanning 120+ countries; translated customer needs and feedback into clear product decisions, managed scope, and drove adoption of AI-powered planning features.
- Partnered with engineering to shape product direction for ML model improvements; improved model efficiency by 80% by defining clear requirements, success metrics, and validation criteria upfront.
- Supported feature rollouts and adoption initiatives; produced enablement materials, onboarding guides, and feedback loops ensuring customers realised value from new platform capabilities.
- Worked cross-functionally across engineering, delivery, and commercial teams daily; bridged technical and non-technical stakeholders in a fast-paced, scaling enterprise environment.

Product Manager — AI/ML — *iQube Research & Incubation Hub*

Sep 2021 – Jan 2023 — Coimbatore, India

- Owned the full product lifecycle across 6 concurrent AI/ML programmes — from discovery and roadmap definition through sprint delivery and launch — shipping 4 AI-powered products to 10,000+ users.
- Defined product direction in collaboration with engineering and design teams; drove backlog prioritisation, sprint planning, and iterative delivery cycles cutting time-to-ship by 35%.
- Translated customer needs and feedback into clear product decisions; improved client CSAT from 3.2 to 4.6/5.0 through structured discovery, rapid iteration, and data-informed roadmap decisions.
- Supported AI and emerging technology adoption across client use cases; defined use cases, success metrics, and go-to-market messaging for 4 AI-powered products in a startup-scale environment.

Research Intern — PRISM — *Samsung R&D*

Nov 2022 – Mar 2023 — Bangalore, India

- Contributed to product and platform development; optimised algorithm performance by 65% and built internal tooling for real-time performance tracking.

Research Intern — *Indian Institute of Technology Madras (IIT-M)*

May 2023 – Jul 2023 — Chennai, India

- Applied ensemble ML models achieving 92% predictive accuracy; delivered data-driven product insights for organisational decision-making.

EDUCATION

M.Sc. Computer Science — Intelligent Systems — *Trinity College Dublin*

2025 – 2026 — Dublin

Dissertation: AI Ethics & Corporate Responsible AI Systems — **Grade: Distinction** — Trinity Career Skills Award

B.E. Information Science & Engineering — *Anna University* — 9.2/10 CGPA

2020 – 2024 — Chennai, India

KEY ACHIEVEMENTS

- Google Cloud Agentic AI Hackathon** — Grand Finalist, Top 250 of 50,000+ participants; built IGNITRIX, a dual-agent adversarial AI financial intelligence system end-to-end in 48 hours.
- Bloomberg BPuzzled** — Winner, Trinity College Dublin; advanced analytical and financial problem-solving demonstrated in Bloomberg's flagship campus competition.
- Smart India Hackathon** — Grand Finalist; engineered autonomous underwater vehicle system outperforming DRDO benchmarks by 15%.
- IEEE Women in Engineering** — Chapter Chair; 15+ STEM workshops across 8 schools, increasing female engineering participation by 40%.
- Class Representative**, MSc Computer Science, Trinity College Dublin & Postgrad STEM Convenor.
