

Navina Ganapathy Amuthan

navinagamuthan@gmail.com — +353 087 177 4563 — [LinkedIn](#) — [Personal Website](#) — Dublin, Ireland

Valid visa with full-time work rights in Ireland. No sponsorship required. TCD MSc Computer Science graduate.

Read Me

- **Core stack:** Python, R, SQL, TensorFlow/PyTorch, LLM APIs (OpenAI, Anthropic, Llama, Gemini), Spark/Hadoop, Tableau, Power BI
- **Best known for:** shipping 4 to 5 AI/ML features to 10,000+ production users (CSAT 3.2 to 4.6) and placing top 0.5% of 50,000+ at Google's Cloud Agentic AI Hackathon
- **Current obsession:** making AI systems provably fair; built [AuditAI](#), an EU AI Act fairness-audit pipeline, this month

Skills

- **Programming:** Python (Pandas, NumPy, scikit-learn), R, SQL, TypeScript, Java
- **Machine Learning & AI:** statistical analysis, data mining, model training and evaluation, ML pipeline design, NLP, computer vision, LLM fine-tuning, prompt engineering, agentic systems (MCP, LangGraph), responsible AI and EU AI Act compliance
- **Big Data & Cloud:** Spark, Hadoop, AWS, Azure, Google Cloud (Vertex AI), Docker, Git and CI/CD
- **Visualisation:** Tableau, Power BI, matplotlib, seaborn, Excel
- **Consulting:** Fortune 500 client delivery, stakeholder management, coaching and mentoring, agile

Experience

Associate Implementation Engineer, E2open

Sep 2024 – Jun 2025

- Delivered end-to-end data-driven implementations for Fortune 500 clients across 120+ countries in production environments, owning client calls, requirements, and configuration debugging with Python and SQL
- Cut client setup time by roughly 70% by building standardised configuration templates and playbooks applied across 3 to 4 enterprise implementations
- Built Power BI financial dashboards surfacing client business performance, enabling operational decisions and building client trust at stakeholder level

Product Manager, iQube R&D Hub

Sep 2021 – Dec 2023

- Shipped 4 to 5 machine learning features to 10,000+ production users, including ML-powered image classification and an NLP customer-service bot, raising CSAT from 3.2 to 4.6
- Led and mentored an 8 to 10 person engineering and design team at a startup generating about 1 crore INR (about EUR 110K), authoring 3 to 4 PRDs and 2 roadmaps

ML Research Intern, Samsung R&D (PRISM)

Nov 2022 – Mar 2023

- Achieved 90%+ accuracy on a code-optimisation classification model recommending time and space complexity reductions, validated on 100 to 200 real company code samples

Research Intern, IIT Madras

Jun 2023 – Aug 2023

- Conducted statistical analysis and data mining on a 500+ participant behavioural dataset for a character-strengths research project at the Dept. of Management Studies

Project Lead, LEWAP / Ps-Eau (UNESCO)

Apr 2026 – Jun 2026

- Led a 6-person team delivering corporate strategy and stakeholder-engagement frameworks for a UNESCO water-access programme

Projects & Research

- **[AuditAI](#):** automated AI compliance auditor; trains a credit-risk model, quantifies bias (statistical parity, disparate impact, equalized odds), classifies risk under the EU AI Act, and generates the audit report with an LLM; Python, scikit-learn, Next.js dashboard
- **[IGNITRIX](#):** dual-agent adversarial financial AI (MCP retrieval, LLM-as-Judge) handling about 50 to 60 real users' financial data; top 0.5% of 50,000+ entrants, Google Cloud Agentic AI Hackathon
- **[EIREVAL](#):** LLM evaluation harness benchmarking model performance on Irish and EU financial regulation
- **MSc Dissertation:** AI-ethics compliance framework for financial AI under the EU AI Act and GDPR

Education

MSc Computer Science (Intelligent Systems), Trinity College Dublin – Distinction

2025 – 2026

B.E. Information Science & Engineering, Anna University – 9.2/10

2020 – 2024

Awards & Leadership

- Deloitte Case Competition Finalist; Bloomberg BPuzzled Winner (TCD); Smart India Hackathon Grand Finalist
- Class Representative and STEM Convenor, TCD; IEEE Women in Engineering Chair (undergraduate)
